

Biocidal products and their approval

Are you planning to place your biocidal products on the EU market? Is your business challenged by the Biocidal Products Directive (BPD)?

DHI can help you.

We are experienced in the compilation of dossiers for industry.

We are experts in the evaluation of active substance and product dossiers for the competent authorities.

We have evaluated all sections of the dossier:

- identity
- human toxicology
- eco toxicology
- efficacy

Is efficacy a particular focus of your product dossier?

Then we would like to help you:

- formulate an acceptable claim for your product;
- define the right conditions of use;
- identify the right efficacy test; and
- give an independent evaluation of test results.

About DHI

DHI is an international consulting and research organisation. Our objectives are to advance technological development and competence within the fields of water, environment and health. We offer a wide range of consulting services and leading edge technologies, software tools, chemical/biological laboratories. We are more than 950 employees worldwide.

Our staff of biocidal experts consists of 30 scientific consultants committed to solving a wide variety of challenges faced by the industry concerning the BPD. We provide services within eco toxicological tests, classification, labelling and dossier preparation of biocidal products.
